REASONS FOR ALLOWANCE

1. This office action is in response to the terminal disclaimer filed on 12/08/06. Claims 1-21 are being allowed over the prior art of record. Prosecution on the merits is closed in this application.

2. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach, or suggest the claimed limitations of (in combination with all other features in the claims) generating multiple bit maps suitable for high speed printing comprising the steps of generating a page description code representing a template, executing the page description code, retrieving variable data, associating the variable data with a graphics state, applying the graphics state tot the variable data to generate variable data bit map and emerging the variable data bit map with the template bit map, the prior of record especially does not teach the merging of variable data with the bit map of the template, wherein the graphics state corresponding to the variable data area is applied repeatedly to the variable data to generate a multitude of variable data bit maps without the need to repeat the execution of the page description language code to generate a bit map of the template, and during the execution, identifying the variable data area defined by the page description code and reserving the graphics state corresponding to the variable data processed.

Any comments considered necessary by Applicant must be submitted no later than the payment of the Issue Fee, and to avoid processing delays, should preferably

accompany the Issue Fee. such submissions should be clearly labeled "comments on statement of Reasons for Allowance".
